Projects

StayNext (Accommodation Booking Platform)

Live | GitHub

Node.js, Express.js, MongoDB, Mongoose, EJS, Bootstrap

- Built a full-stack accommodation booking platform with CRUD functionality for property listings and reviews.
- Developed RESTful routes and dynamic EJS views for listing creation, editing, viewing and deletion.
- Implemented review management using MongoDB ObjectIds and Mongoose schema relationships.
- Applied Joi validation, authentication, authorization, and centralized error handling middleware.
- Designed responsive user interfaces using Bootstrap for better user experience.

Zerodha Clone (Full-Stack Stock Trading Platform)

Live | GitHub

MongoDB, Express.js, React.js, Node.js, Bootstrap, Passport.js

- Developed a full-stack stock trading platform inspired by Zerodha using the MERN stack with separate frontend, backend and dashboard applications.
- Implemented secure user authentication and session management using Passport.js, Express Session and MongoDB.
- Built RESTful APIs for user authentication, holdings, positions and order management with protected routes.
- Designed responsive React-based user interfaces with reusable components, React Router and Bootstrap for an intuitive trading experience.
- Deployed the complete application on Render with separate frontend, backend and dashboard services, integrating MongoDB Atlas for cloud database management.
